

Rest Easy.

You can with Uplink™ wireless notification. Without relying solely on your phone line for a security system connection to police and fire departments, you and your family can always feel safe knowing that Uplink provides wireless backup in case your landline is cut or broken. It's priceless peace of mind.

stay connected. stay protected.

 **Uplink**™
A Numerex Wireless Solution

Always on Duty

Uplink™ is a dedicated, wireless communications solution for security monitoring. It reports all alarm, operational status, and event messages reliably, securely, and instantly via central station receivers, phone, Web, email, text message or alphanumeric page any time and any place an alarm event occurs.

Benefits of Uplink Wireless Notification

- Your monitoring system always has backup, keeping you connected to police and fire departments.
- Compatibility with most alarms makes it an ideal add-on for systems installed days, months or years ago.
- Those who have eliminated landlines from their homes can maintain an alarm system with wireless monitoring.
- The system is the perfect alternative to secure properties that may be remote and/or occupied only occasionally.
- CellemetryXG™, the largest wireless data network in the Western Hemisphere, ensures a strong, dedicated signal.

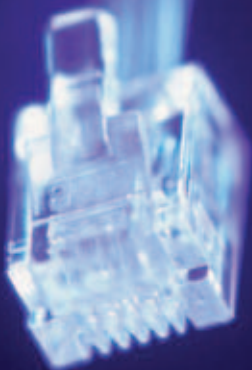

stay connected. stay protected.

Too Much Security?

There's no such thing. That's why Uplink™ wireless notification is so important. Since it works with most alarm systems, you can add it during initial installation or as an add-on to an existing system and keep your family and property safe even if your phone line is cut or broken. It's an added layer of protection.
